

Advanced Vascular
Access Course

AJiNE

Increase your confidence to place lines safely.

This Course covers:

- Midline
- PICCs and central lines
- Anatomy and line choice
- Safety and infection issues
- Chest x-ray interpretation
- Practical simulated ultrasound-guided insertion of midline/PICC/CVC including subclavian

“ I see and use these lines every day, and this course still taught me plenty of new things that will improve the way I handle them

“ very very relevant as a consultant anaesthetist Currently on ITU/ Anaesthetics so it was very helpful in increasing confidence to attempt lines safely and recognise important complications.

“ Extremely relevant for all practicing anaesthetists.
